Description of violations and recommendations for corrections:

3745-27-09-F (1) - Daily soil cover is not being applied as required. I was told by Mr. Scarbury, landfill supervisor, that equipment failure was the reason for the non-compliance.

3745-27-08-P - requires standby equipment or a contingency plan to handle the disposal of waste material in case of equipment failure.

3745-27-09-F (3) & I (2) - A large area of the landfill, 3-5 acres, has not been seeded as required. Because of the lack of vegetative growth, erosion is quite severe.

After talking with Mr. Scarbury, it is my understanding that this acreage will be seeded this fall.

3745-27-08-A - As indicated in my May inspection notice, a topographic survey of the landfill must be submitted to this office before it can be determined if you are in compliance with your approved plans. To date, I have not received this information.

You are hereby notified of the above violations. Failure to correct these violations within \_\_\_\_\_ days may result in the revocation, suspension or denial of your solid waste disposal license or other legal action.

If assistance in correcting these violations is desired, contact your Local Health Department and/or district office of the Environmental Protection Agency.
